Reminder: Long day of concreting on Friday, December 22, 2017

Dear Ms, Mr,

I hereby remind you of the fact that Mobilis has the 1st long day of concreting on Friday, 22 December 2017, for the bicycle parking on the Koningin Julianaplein.

Depositing concrete for bicycle parking

On Friday, December 22, the first large floor of approx. 600 m3 concrete will be poured. This concrete is to be poured consecutively and lasts the entire working day from 07.00 - 19.00 hours.

“Vlinderen”

Immediately after pouring the floors the concrete is finished off. This is called “Vlinderen”. Vlinderen is the leveling and finishing of a freshly poured concrete floor. It is used to make the top layer watertight and smooth. A “vlindermachine” is used for the finishing off the concrete (see photo 1).

Photo 1. “Vlindermachine

The noise causes a humming noise and can, depending on the weather conditions, last until late at night, or at the latest at 11.00 pm.

If you have any questions about this letter, please feel free to contact me. In case of calamities, we can be contacted during the work on tel: 06-21504617.

Sincerely,

Eva Zonneveld
