Demolishing the concrete deck of the New Babylon Tunnel

Dear Ms, Mr,

On May 22, Mobilis will start demolishing the concrete deck of the New Babylon Tunnel. The New Babylon Tunnel is located at the far end of our building site on the Koningin Julianaplein, in the corner of the Stichthage and New Babylon buildings. The tunnel was once constructed, because there was a plan for the construction of a parking garage for cars on the Koningin Julianaplein. The tunnel would then connect this parking garage with the existing parking garage of Q-park.

To finish the underground bicycle parking, the old concrete of the tunnel will be demolished. The tunnel ran straight through our construction pit. We have now closed the connection to Q-park (see photo 1).

Photo 1. Current situation of the New Babylon Tunnel

The demolition is carried out with a small crane equipped with a chipping hammer (see photo 2). The work takes place during the day between 7 a.m. and 7 p.m. and takes about 15 working days.

The work unfortunately gives noise nuisance. This noise pollution is within the standards of the municipality of The Hague.
